Heat-sealable BOPP film, for printing, lamination and flexible packaging, supply to packaging converters and distributors.
可热封BOPP薄膜，用于印刷、复合与软包装，供应包装加工商与经销商。

3. PRODUCT DESCRIPTION 产品说明

Metalized BOPP film heat sealable one side and treated the other side.
BOPP 镀铝膜，单面热封、另一面电晕处理。

[Metalized BOPP film heat sealable one side and treated the other side.]

1// Product Description

Metalized BOPP film heat sealable one side and treated the other side.

2// General Use

It is used in laminations with other films for packaging of foodstuffs such as crackers, chips and other "snacks", requiring a good seal and large rate of sealing.

3// Properties and Tolerance

4// Packing

The standard armed pallet will have a polyester band, triple tensioned wrapping, floor and roof covered with PE or CPP and one wood plank will join another like an "H".

The pallet will be composed of 2 to 6 reels of equal width and thickness. The caps should be plywood preferably triple and must be of 25mm thickness.

The reels should have up to 2 connections per roll and shall not exceed 10% of the total batch.

5// Warranty.

The supplier shall certify that the film will maintain its physical and chemical properties for a minimum period of 6 months from the date of production, for each lot a certificate of quality containing the physical and/or chemical analysis will be sent.

The supplier shall ensure that the film can be used in direct contact with food and that meets the requirements in accordance with the regulations of the EEC 90/128 and the FDA# 21 CFR 177.1720

6// Identification

Each reel must have an external label with the following information:

//Supplier Name.

//Type of Film.

//Purchase Order ·

//Code of the material.

ASIA PACIFIC INDUSTRY GROUP CO., LIMITED

//Date of manufacture.

//Due Date.

//Meters, width and thickness

//Gross Weight and net weight.

//Internal or external Treated Layer

//Number of connections

7//Storage and Handling

It is not recommended submitting the film to conditions of high humidity and extreme temperatures, it is recommended to avoid any moisture condensation on the film, and that will not exceed an ambient temperature of 35º C and a relative humidity of 60 %, it is recommended to protect the reels from direct exposure to sunlight or heat sources.

The pallet must be transported and protected with a plastic cover until its use; the palletizing must be made with dry wood to ensure no moisture release in the transportation.

8// Foreign bodies

The film should have no strange smell and should be free from foreign bodies.

9// Microbiology

The film will not show a count greater than 100 cfu/g of aerobic mesophile and must be completely free of bacteria.

10//Toxicological information

The film does not have specific danger when it is used in an appropriate manner and is not associated with any toxic compound, there are no known carcinogenic effects of these compounds, are not used substances that can cause damage to health, it is a flammable product, but may burn when it is exposed to the flame by releasing a smoke harmful to health, preventing breathing.

SIGMAPLAST reserves the right to refuse a lot or disqualify a supplier by not complying with the tolerances exposed.
